WORK EXPERIENCE

Mern Stack developer

Al-Burraq Technologies

Feb 2024 - Jun 2024 | Lahore, Pakistan

Achievements/Tasks

- Write organized code for debugging various bugs in the code
- Code testing using js testing libraries like jest
- React express mongodb sql development
- Framework, i worked with includes nest js, next js and express

Backend developer

Eonwaves-lab

Jul 2024 - 6/2025 | Bahria town Rwp

Achievements/Tasks

- Write code in nodejs
- Write smart contract in solidity, solana rust, wax
- integrate smart contract and backend api with react/nestjs

EDUCATION

BS Electronics Engineering

GIK Institute

Aug 2019 - May 2023

Final year project

- Wireless robot with hand gesture control(C programming, Atmega32, 8051 microcontroller)

MS Artificial Intelligent

Bahria University H11-Islamabad

Jan 2026 - May 2028

SKILLS

Microcontrollers

Nodejs

Reactjs

Mongodb

Docker

C/C++

Version Control(git)

FastApi

Matlab

sql/nosql db

Tensorflow

Matlab

Python

ML/DeepLearning

langchain

langraph

VectorDB

PORTFOLIO PROJECTS

Stock price prediction

Key Features

- Developed a deep learning-based stock price prediction model using LSTM networks to capture long-term temporal dependencies in historical market data, improving forecasting accuracy over traditional regression models.

Pdf-Rag-chat system

Key Features

- Build a fully functional research paper QA chat system with langchain, vector db, fastapi and docker setup with frontend in react

Multi-Agent AI Research Assistant

Key Features

- Built a LangGraph-based multi-agent system that automates research workflows by coordinating specialized agents for information retrieval, research analysis, and response generation. Implemented agent orchestration, state management, tool calling, and collaborative agent workflows using LangChain and LangGraph.
